DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. The factual inquiries set forth in *Graham* v. *John Deere*Co., 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 3. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pasquier et al., WO 99/37701 (hereinafter "Pasquier"). Pasquier teaches a polymeric composition comprising a polymer P2 obtaining by cross-linking a polymer

Application/Control Number: 10/567,116 Page 3

Art Unit: 1796

prepared by ring opening metathesis of a cycloolefin monomer (A) in the presence of a metathesis polymerization catalyst (D).

See Pasquier, pages 16-20. The polymeric composition further comprises a second polymer of suitable organic materials of high molecular weight comprising copolymers of maleic anhydride with styrene. See Pasquier, page 21. The polymeric composition further comprises fillers and chain transfer agents. See Pasquier, pages 18 and 23. Pasquier further teaches the use of the polymeric composition in different final forms such as molding, coating or injection molding. See Pasquier, page 23.

- 4. Pasquier differs from the present invention in that the present invention does not teach instant invention in a single embodiment. However, Pasquier teaches enough about the objective of transforming polymeric composition into end uses that one of ordinary skill in the art would be motivated to combine polymers and additives. Such motivation would be met with a reasonable expectation of success because Pasquier makes it clear that all embodiment and components can be used together to achieve the objective of the invention. See Pasquier, page 2.
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert D.

Harlan whose telephone number is (571) 272-1102. The examiner

Page 4

can normally be reached on Mon-Fri, 10 AM - 8 PM.

6. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David W. Wu can be reached on (571) 273-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

7. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
